## Concord Freeform Lenses

- Digital soft freeform lens design
- Corridor length ( $= 15\text{mm} / U = 16\text{mm} / U = 17\text{mm} / U = 18\text{mm}$ ) symbol is positioned under nasal side reference cross
- Corridor length is automatically calculated according to Rx, PD and frame measurements
- Add power is positioned under temple side reference cross
- Design is best suited for experienced PAL wearers wanting greater visual acuity in near vision
  - Lens design has wide distance and near areas
  - Oblique astigmatism is minimized
- Wearers adapt quickly to their lenses, enjoying greater visual comfort
