

# MANUFACTURING

## Recommended Frames

### 603 Panther

Modern wrap styling protects without the need for side shields. Anti-slip temples help to prevent slippage. Robust modern design. Plastic frame with no loose objects.

### 608 Vega

The Vega, plastic wrap frame with a sleek design, offering distortion free vision using digital free form technology adhered to your prescription.

## Recommended Lens Coatings

BPI TINT YELLOW: Total acuity in vision.

BPI TINT BLUE: Improves object contours and colour perception, reduces glare and UV protection.

IOAC's Certified Prescription Safety Eyewear provide clear, distortion free vision with superior quality optics.

The manufacturing industry is broad and diverse, it generally includes the assembly, processing and finishing of physical products in the presence of human workers. Over 30% of the total eye injuries are working as assemblers, sanders and grinding machine operators. Employees work with milling machines, planers, lathes, threading machines and other production tools putting them at risk of industrial eye injuries.

Our frames are durable and protect against the risk of harmful chemicals from manufacturing or cleaning processes.
