

PHARMACEUTICAL & HEALTH

IOAC's Certified Prescription Safety Eyewear is designed to deliver clear, distortion free vision with superior quality optics.

Pharmaceutical laboratories have higher risk of chemical burns, temperature changes and injuries caused by sharp objects. IOAC frames offer full coverage and protection against chemical splash, vapour, airborne microparticles and bacterial infections caught through the eyes.

Healthcare workers are also exposed to bright lights for long hours as they go about their work. The blue light emitted by bright lights and screen have serious short and long term implications for health.
